

The Best Way to Work is Safety

Tang Tuck Kim Registered Surveyor
RM Team 2013

Company Profile

Tang Tuck Kim Registered Surveyor was established in April 1987. Since then, it has expanded into one of the biggest registered land surveying firms in Singapore with an annual sales turnover of \$4 million and a staff-strength of 56 people.

No Compromise in Safety

The company's initial take about having a risk management system was that they were after all, not dealing with heavy infrastructure such as cranes, and therefore it was not critical to have it. However in 2012,

the company decided to embark on the bizSAFE journey because its clients requested a minimum safety certification of bizSAFE Level 3 to be a potential business partner. Due to the lack of experience on bizSAFE administration and procedures, the company decided to engage the services of a risk management consultant.

The risk management team at Tang Tuck Kim Registered Surveyor started to identify and implement the risk control measures required at their worksite. A series of training on company-specific hazard controls were initiated to the staff in the company. The senior management of Tang Tuck Kim Registered Surveyor was very supportive of these efforts during the entire process. In fact, they took a personal concern towards the field workers, reminding them constantly to use their personal protective equipment (PPE) when they go on site.

Since achieving the bizSAFE Level 3 certification, the company has been extra cautious in minding their

work safely. The company now uses step ladders to retrieve files instead of standing on chairs to prevent workplace mishaps. Financially, the company has been able to secure many new business prospects with its newly-acquired bizSAFE Level 3 status.

Tang Tuck Kim Registered Surveyor believes that safety is important as human lives are involved and there shall be no compromise.

As a leading professional, Tang Tuck Kim Registered Surveyor strongly encourages all companies to take the initiative to embark on the bizSAFE programme without further procrastination.
